SUMMARY

Senior Software Engineer with 15+ years of experience delivering end-to-end solutions across fintech, loyalty platforms, e-commerce, and B2B marketplaces. Skilled in both backend systems (Node.js, Golang, Java, PHP, .NET) and frontend development (.NET/C# desktop clients, ExtJS, web portals). Led platform consolidation and modernization projects, decomposed monoliths into microservices, and built payment systems handling hundreds of millions IDR in monthly transactions. Production experience across AWS (Lambda, ECS, SQS, Aurora), GCP, PostgreSQL, MySQL, Redis, and event-driven architectures. Proven ability to own products end-to-end from design through deployment and maintenance. Experienced collaborating with distributed global engineering teams across the US, UK, and Southeast Asia. Open to senior remote roles building scalable full-stack platforms.

EXPERIENCE

Trilogy, Inc

Apr, 2024 – Dec, 2025

AI-first Software Engineer III

Austin, TX (Remote)

- Upgraded Jive platform libraries and frameworks across various modules, remediating security vulnerabilities and modernizing OAuth login integration to improve long-term maintainability
- Resolved critical production bugs and delivered feature enhancements that improved platform stability and system performance
- Spearheaded platform consolidation project to unify multiple Jive community systems into a single platform, strengthening customer retention and reducing operational complexity

Tech: Java, Spring Security, Apache Struts 2, PostgreSQL, Oracle, MySQL, MSSQL, AWS (ECS, CloudFormation, S3)

PT. Global Poin Indonesia

Dec, 2019 – Jan, 2024

Senior Backend Engineer

Jakarta, Indonesia

- Established AWS CI/CD pipelines (Bitbucket Pipelines, Serverless Framework) and standardized OAuth-based authentication for all customer-facing API endpoints, improving security posture and developer velocity
- Spearheaded infrastructure migration from Azure to AWS, reducing hosting costs and improving deployment reliability across 10+ microservices
- Built and maintained the end-to-end back-office invoice and payment system including admin interfaces and backend APIs, disbursing hundreds of millions IDR monthly to 90% of GetPlus vendors
- Developed affiliate marketing integration processing tens of thousands of e-commerce transactions and generating millions in monthly revenue

Tech: Node.js, PHP, AWS (Lambda, SQS, S3), Aurora MySQL, Redis

Shopee Indonesia

July, 2019 – Dec 2019

Senior Software Engineer

Jakarta, Indonesia

- Developed infographic and calendar management features end-to-end for Shopee Indonesia's growth team, building backend APIs serving 19 million monthly active users
- Diagnosed and resolved production issues to maintain platform stability across high-traffic services

Tech: Golang, GCP, Redis

Bizzy Indonesia

June, 2018 – July, 2019

Software Development Engineer

Jakarta, Indonesia

- Enhanced catalog management and approval management features across backend APIs, resolving system bugs to improve platform reliability
- Designed and implemented a new user budget management microservice, expanding platform capabilities for enterprise procurement workflows

- Built pub-sub messaging systems for asynchronous cross-domain data synchronization, reducing inter-service coupling and improving response times

Tech: Node.js, AWS (Lambda, Kinesis), MongoDB, MySQL

Errai Pasifik

Sept, 2013 – June, 2018

Senior Software Engineer

Jakarta, Indonesia

- Implemented SAML-based SSO authentication for LoopUp, enabling enterprise customers to use their identity providers for single sign-on access to teleconferencing services
- Managed CI/CD build and deployment pipelines for all Jakarta-based team projects, ensuring reliable release processes
- Mentored junior engineers in programming best practices, accelerating onboarding and fostering team growth
- Developed the Account Management Portal end-to-end, replacing the legacy system with a modern web interface and backend APIs for improved user experience and maintainability

Tech: .NET, C#, SQL Server

SKILLS

- **Distributed Systems & Architecture:** Microservices, event-driven architecture, pub-sub messaging, scalable backend design, reliability engineering, monolith decomposition, REST API design
- **Languages:** JavaScript, Node.js, Golang, Java, PHP, C# (.NET), Python
- **Cloud & Infrastructure:** AWS (Lambda, ECS, SQS, SNS, S3, RDS, Aurora, CloudFormation, CloudWatch), Azure, GCP, Docker, DevOps, CI/CD (Bamboo, Bitbucket Pipelines, GitHub Actions), Infrastructure as Code
- **Databases:** PostgreSQL, MySQL, Aurora MySQL, SQL Server, MongoDB, Redis
- **Practices:** Performance optimization, reliability engineering, code review, mentoring, agile delivery (Scrum, Kanban), unit testing, integration testing

EDUCATION

University of Indonesia

2014 – 2016

Master, Magister of Information Technology

Thesis on IT risk management in international startup environments. Focus on strategic alignment between organizational vision and Information Technology.

University of Indonesia

2005 – 2010

Bachelor, Computer Science

Member of Microsoft Innovation Center, University of Indonesia.
